This game is so relaxing and fun. It is nice building tracks and playing with a model trains without the packing up afterwards. I cannot wait for more content and hopefully more trains to be added.

My 6 year old boy loves the game as well.. i hoping for more new update like new trains, new stuff and other new thing. While it's still in development now I can't wait to see the finished project. I've always wanted to build model trains but space and money have made it prohibitive. Once there's more props and accessories in place this game will envelope a lot of my time.

. how do u restart the game??
